CyberCP SPECIAL SESSION | Understanding the Crisis + Critical Infrastructure Resilience | Sep. 28, 2022, 10:30 AM–12:00 PM

The United States is under constant cyber attack from Russia, China, and other nation state adversaries. Cyberattacks are low cost missions that disrupt U.S. national security. The CyberWar has started. Protecting the most critical US infrastructure is paramount to maintaining the traditional military capabilities of the country. This [CyberCP](#) panel explores the history, the best practices, capabilities and technologies developed for the US defense and intelligence community, bringing these to the critical infrastructure sectors to defend American Industry.
